

Pattern Maker (60-100%) - Sports Apparel

Location: Givisiez, FR, CH

Precision, performance, and fit are at the core of everything we do. As an established sportswear brand, we develop high-quality apparel designed for movement, durability, and comfort.

To strengthen our product development team, we are looking for an experienced Pattern Maker who combines technical excellence with a passion for sports apparel.

Your responsibilities

- Create, develop, and modify patterns for technical sportswear and apparel collections
- Translate design concepts and technical sketches into production-ready patterns
- Develop and validate fit using 2D and 3D pattern-making tools
- Use 3D garment simulation software to support fit development, virtual fittings, and design decisions
- Ensure optimal fit, functionality, and consistency across all sizes
- Perform pattern grading and size set development
- Collaborate closely with design, development and product manager teams
- Support fittings, proto reviews, and wear tests; implement corrections efficiently
- Prepare accurate technical documentation for production and suppliers
- Contribute to continuous improvement of fit standards and construction methods

Your profile

- Completed education and/or several years of experience as a Pattern Maker in the apparel industry
- Strong technical understanding of garment construction, materials, and performance fabrics
- Experience with CAD-based pattern-making systems Assyst
- Experience working with 3D CLO software
- Confident in pattern grading and fit development for sportswear
- Structured, detail-oriented, and solution-focused working style
- Team player with the ability to work independently
- Good communication skills; experience working with international partners is an advantage
- Experienced working with a PDM system, good skills in Microsoft-Office & Adobe Illustrator
- English business fluent & very good knowledge of German or French with an extensive technical vocabulary

What we offer

- A 60–100% position with flexibility
- Work within an established sports brand with high quality and performance standards
- A young, motivated, and collaborative team
- Modern working environment and involvement throughout the entire product development process

If you are passionate about technical apparel, fit, and performance and want to help shape the next generation of sportswear, we look forward to your application.
